

Alkes Plus

La centralina Alkes PLUS si distingue come un dispositivo elettronico avanzato, offrendo un controllo unico sulla velocità di salita e discesa delle serrande.

Si tratta di un inverter dotato di una raffinata logica integrata progettata per gestire motori trifase da 230V. Pur essendo concepita per l'ambiente industriale, la sua straordinaria flessibilità consente un utilizzo versatile in svariate applicazioni.

Le caratteristiche salienti includono:

- Controllo tramite interruttori o pulsantiere a contatto pulito
- Partenze e arrivi con possibilità di rallentamenti personalizzabili
- Ingresso radar e controlli di sicurezza, quali fotocellule e/o barriere di fotocellule
- Selezione tra finecorsa meccanico o finecorsa digitale
- Schermo OLED da 1,1 pollici con risoluzione 128x64 pixel per una programmazione intuitiva
- Resistenza alle temperature da -20°C a +85°C
- Capacità di gestire motori fino a 2,2 kW
- Gestione del freno motore in corrente continua

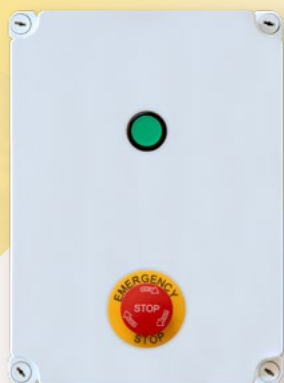

The Alkes PLUS control unit stands out as an advanced electronic device, offering unique control over the speed of ascent and descent of shutters.

It is an inverter equipped with sophisticated integrated logic designed to manage 230V three-phase motors. While conceived for industrial environments, its extraordinary flexibility allows versatile use in various applications.

Key features include:

- Control via switches or clean-contact push-button panels
- Starts and stops with customizable slowdown options
- Radar input and safety controls, such as photocells and/or photocell barriers
- Selection between mechanical limit switches or digital limit switches
- 1.1-inch OLED screen with a resolution of 128x64 pixels for intuitive programming
- Resistance to temperatures from -20°C to +85°C
- Capability to manage motors up to 2.2 kW
- Management of the motor brake in direct current

Versioni — Versions

cod. 79280001

Alkes Plus 1

Inverter con logica integrata con pulsante start e pulsante a fungo stop

Inverter with integrated logic featuring a start button and emergency stop mushroom button

cod. 79280002

Alkes Plus 2

Inverter con logica integrata con pulsantiera salita discesa e pulsante a fungo stop

Inverter with integrated logic and up/down push-button control panel with emergency stop mushroom button.

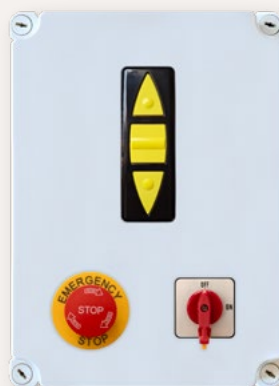

cod. 79280003

Alkes Plus 3

Inverter con logica integrata con pulsante start, pulsante a fungo stop e interruttore sezionatore

Inverter with integrated logic featuring a start button, emergency stop mushroom button, and isolator switch.

cod. 79280004

Alkes Plus 4

Inverter con logica integrata con pulsantiera salita discesa, pulsante a fungo stop e interruttore sezionatore

Inverter with integrated logic featuring an up/down push-button control panel with emergency stop mushroom button, and isolator switch.
